Disruptive Physicians: From Credentialing to Disciplinary Action
Minimizing Liability for Poor Quality of Care, Negligent Credentialing and Physician Lawsuits

THURSDAY, NOVEMBER 4, 2010
1pm Eastern  |  12pm Central  |  11am Mountain  |  10am Pacific

Today’s faculty features:

Suzanne A. Fidler, M.D., J.D., CPHRM, Senior Director of Risk Management and Patient Safety Officer, Desert Regional Medical Center, Palm Springs, Calif.
Michael R. Callahan, Partner, Katten Muchin Rosenman, Chicago
Julian Rivera, Partner, Brown McCarroll, LLP, Austin, Texas

The audio portion of the conference may be accessed via the telephone or by using your computer’s speakers. Please refer to the instructions emailed to registrants for additional information. If you have any questions, please contact Customer Service at 1-800-926-7926 ext. 10.
Continuing Education Credits

For CLE and/or CPE purposes, please let us know how many people are listening at your location by completing each of the following steps:

- Close the notification box
- In the chat box, type (1) your company name and (2) the number of attendees at your location
- Click the blue icon beside the box to send
**Tips for Optimal Sound Quality**

If you are listening via your computer speakers, please note that the quality of your sound will vary depending on the speed and quality of your internet connection.

If the sound quality is not satisfactory and you are listening via your computer speakers, you may listen via the phone: dial **1-866-869-6667** and enter your PIN when prompted. Otherwise, please send us a chat or e-mail **sound@straffordpub.com** immediately so we can address the problem.

If you dialed in and have any difficulties during the call, press *0 for assistance.

The Challenges of Addressing Disruptive Behavior in the Community Hospital Setting

Suzanne A. Fidler, M.D., J.D., CPHRM
Senior Director of Risk Management
Patient Safety Officer
949-631-0055
drfidler@physicianforlaw.com
The Joint Commission (TJC)
“Behaviors that undermine a culture of safety”

- All accreditation programs must adopt a code of conduct that defines disruptive, unacceptable behaviors. (EP 4)
One Approach

- Administration delegates the preparation of the policy to the Chief of Staff
- Chief of Staff collaborates with the Medical Staff attorney to draft policy
- At the General Staff Meeting, the policy is presented to the medical staff
Problems?

- Physicians voice opposition to the policy
- Several physicians set up an ad-hoc committee to discuss the policy
- Other physicians bring sample policies from organizations such as the American Medical Association
- Some physicians threaten to move their practices
Physicians’ Perspective

- Medical staff is self-governing
- Physicians are not the only offenders
- Peer Review
- Competition, economic tool
- Recredentialing process
- Outspoken or unpopular physicians may be perceived as “disruptive”
Protections Offered

- Establish a clear channel to report disruptive behavior
- Objective data collection
- Ensure code of conduct is incorporated into the medical staff rules and bylaws
- Hospital maintains a culture that is supportive and inculcates a positive collaborative culture of safety
Focus on Rehabilitation, Not Discipline

• Adopt a standardized mechanism to investigate and document disruptive behavior
• Establish an informal review process
• Collegial intervention should be established
• Administration provides education and training
• Appropriate referral process for physicians requiring evaluation, diagnosis, and treatment
• Monitoring procedure for the physicians and safety of patients
Dr. Mean

• Dr. Mean is an electrophysiologist who is well trained from a distinguished medical program.
• He moved to the community to establish a private cardiology practice.
• Dr. Mean typically gets irritated if he is paged and the nurses cannot answer all his questions such as the interpretation of the rhythm strips, the list of the patient’s medications, and the content of the physicians’ progress notes.
Patient Bob

- Patient Bob is a 40 year-old executive with a long history of smoking, hypertension, and obesity.
- He is at risk for heart disease and has been admitted for further cardiac testing.
- Dr. Mean plans to perform an electrophysiology study in the morning if the patient has no further chest pain.
Nurse Sally

• Nurse Sally is a recent graduate from a local nursing school and this is her third month working the night shift.

• Around 9 p.m., patient Bob complains of chest pain.

• Nurse Sally checks Bob’s vital signs, listens to his heart, and follows the cardiac protocol by administering nitroglycerin.

• After 10 minutes, patient Bob states that his chest pain has not improved.
Paging Dr. Mean

- Nurse Sally places a call to Dr. Mean’s exchange.
- Dr. Mean does not call back within 15 minutes and patient Bob still has chest pain.
- Nurse Sally places a second call to Dr. Mean’s exchange.
- Dr. Mean does not call back, so Nurse Sally places a third call to Dr. Mean.
Dr. Mean’s Call

- Dr. Mean calls back.
- Nurse Sally begins to present to Dr. Mean the purpose of her call using the SBAR for effective communication per the hospital’s standards.
- Dr. Mean interrupts her and demands to know why she did not give patient Bob additional nitroglycerin.
- Before Nurse Sally can answer, Dr. Mean barks the following orders: get a stat EKG, start a nitroglycerin drip, send cardiac enzymes, get a blood gas, then call me with the results.
- He hangs up before Nurse Sally reads back the orders.
Results Return

- Nurse Sally receives the results and places a call back to Dr. Mean.
- Dr. Mean returns the call and asks Nurse Sally to read the results.
- As Nurse Sally starts to read back the results, Dr. Mean interrupts her and asks her to read the blood gas.
- Nurse Sally did not recall that Dr. Mean had ordered the blood gas.
Interaction

- Dr. Mean begins to scream at Nurse Sally, calling her an “idiot” and demanding that he speak to the charge nurse.
- Nurse Sally becomes tearful and gets her charge nurse.
- In the meantime, Dr. Mean hangs up.
- The charge nurse pages Dr. Mean and Dr. Mean again yells, asking why Nurse Sally did not get a blood gas.
- Nurse Sally enters an incident report into the hospital computer system.
Issues Identified from Case Study

- Dr. Mean’s interactions
  - Interrupting
  - Yelling, barking orders
- Dr. Mean did not abide by the read-back protocol
- Dr. Mean did not promptly return pages
- Nurse Sally’s performance and experience
- Patient Bob’s medical care
Consistent, Fair Approach

Regardless of the following:

- Dr. Mean is the Chair of Cardiology
- Dr. Mean is extremely popular with the Administration and facilitates hospital fund-raising
- Dr. Mean is the only electrophysiologist in the community and brings a lot of business to the hospital.
- Dr. Mean plays golf weekly with the President of the Medical Staff
How to Handle

• If this is Dr. Mean’s first incident (“informal cup of coffee”).

• If Dr. Mean has a pattern of this behavior and this is his third incident.

• Nurse Sally has performance issues and Dr. Mean was advocating on behalf of the patient.

• Dr. Mean is unpopular with the staff who are eager to submit incident reports but overlook other physicians who act similarly.
Checklist for a Fair Process

- Is the Code of Conduct part of credentialing process?
- Did the Code of Conduct define disruptive behavior?
- Did the physician’s orientation include the Code of Conduct?
- Were the facts in the incident report verified?
- Was the response to the disruptive behavior prompt and on target?
Process for Incident Involving Disruptive Behavior: Case Presentation

- Incident entered into hospital internal reporting system
- Event is reviewed and investigated
- Involved staff are interviewed and facts verified
- Issues are identified
- Physician is notified
- Determine level of intervention
Intervention

- “Informal” cup of coffee intervention
- Level 1: “Awareness” Intervention
- Level 2: “Authority” Intervention
- Level 3: “Disciplinary” Intervention
Barriers to the Intervention

- Leadership is not on-board
- The Code of Conduct is not well-drafted
- Definition of “disruptive behavior” is too broad
- Lack of resources to train and rehabilitate
- Insufficient management skills of physician champions
- Physicians fear repercussion, peer review, credentialing file
- Inconsistent approach depending on which physician was involved
Barriers to the Intervention

- No central reporting system
- Time commitment
- Independent medical staff that are not hospital employees
- Physicians provide financial support to the hospital so tendency to ignore certain behaviors.
Tips to Achieve a Successful Disruptive Behavior Approach

- Ensure strong leadership that will apply policies consistently
- Use data to share statistics about the impact of disruptive behavior: patient safety, claims
- Obtain physician input
- Select physician champions
- Implement a simple policy
- Carefully define disruptive behavior
Tips to Achieve a Successful Disruptive Behavior Approach

- Establish a process to report and investigate disruptive behavior allegations
- Incorporate the code of conduct policy into the credentialing & recredentialing process
- Communicate the policy
- Instill a culture of trust and mentoring
- Educate the employees and medical staff
- Establish an effective intervention program focusing on rehabilitation and training and supported by leadership
Legal and Practical Strategies

A Legal Perspective

Legal issues to be Addressed and Revolved

• Compliance with Joint Commission and Bylaw Standards
• State Reporting Obligations
• National Practitioner Data Bank Reporting Obligations
• Negligent Credentialing/Malpractice Issues
• HR Employment Issue Impact
• Peer Review/Confidentiality Issues
• After Care Obligations and Considerations
• Responding to Third Party Inquiries
Joint Commission and Bylaw Standards

- Must determine health status of applicants and existing members of the Medical Staff (MF.06.01.05, EPs 2 and 6)
  - Must make inquiry as part of appointment/reappointment process.
  - Bylaws should contain provisions that accomplish the following:
    - Burden of producing any and all information regarding history of disruptive/impaired behavior is on physician.
    - Failure to disclose requested information from whatever source shall result in withdrawal of application from consideration.
    - If information not discovered until after appointment/reappointment has been completed, physician can be terminated – Data Bank reporting implications.
Joint Commission and Bylaw Standards (cont’d)

- Ongoing obligation to monitor physician conduct and behavior.
- Definition of “professional behavior” and “disruptive behavior” tied to adopted Code of Conduct and/or Disruptive Behavior Policy needs to be included in Bylaws or cross referenced to Policies.
- Physicians should be obligated to disclose any impairment or actions taken at another hospital regarding impaired or disruptive behavior.
- All disruptive behavior needs to be identified and reported via incident report or other method and assessed with direct involvement by and communication with the physician and persons reporting the event.
Joint Commission and Bylaw Standards (cont’d)

- Any “reasonable suspicion” of impairment also must be reported to Department Chair, CMO, VPMA, President of Medical Staff and CEO.

- Failure of physician to cooperate in review or to submit to assessment/evaluation/fitness for duty review may result in disciplinary action.

- Bylaws should make clear that overall goal of any disruptive behavior/impaired physician policy is to work collaboratively with the physician in order to identify source of issues and to develop a plan to help the physician achieve compliance with standards and policies, in order to remain on Medical Staff.
Joint Commission and Bylaw Standards
(cont’d)

- Corrective action should be the last option considered after other remedial measures have failed unless action needs to be taken immediately to protect patients, employees and the general public.

- Joint Commission accredited hospitals must have adopted a Disruptive Behavior Policy by January, 2009 for all hospital personnel – not just physicians.
  - Issues and Complications:
    - Some hospitals have adopted a Code of Conduct applicable to physicians, a Disruptive Behavior Policy applicable to all, a Physician Wellness Committee, an HR Policy applicable to employed physicians as well as a standard for recommending corrective action.
Joint Commission and Bylaw Standards (cont’d)

- A review of these different policies often times reveals conflicting definitions of what is described as “unprofessional” or “disruptive behavior” or “impaired conduct”.

- The result can be confusion about what pathway to follow and possible challenge by physician if corrective action is taken in lieu of progressive discipline set forth in Code of Conduct or Disruptive Behavior Policy.

- Policies need to be reviewed and possibly consolidated and behavior which triggers application of resulting policies or Physician Wellness Committee involvement needs to be made uniform.
Joint Commission and Bylaw Standards (cont’d)

• All affected individuals should be treated in same manner irrespective of whether they are independent or employed – easier said than done.

• Application of different behavior standards and consequences standards may result in legal challenge from physicians/employees as well as different standards of patient care if independent physicians are given more latitude than employed physicians – corporate negligence issues if harm to patients results from inaction.
Data Bank and State Reporting Requirements

• Remedial measures taken with respect to disruptive/impaired behavior are not reportable to Data Bank and usually not to the state unless:
  – Action involves involuntary termination, suspension or reduction of privileges resignation while under investigation or in lieu of reportable corrective action, or a mandatory consultation requiring prior approval and
  – Conduct has or may have an adverse impact on patients.

• Leaves of absence, voluntary reduction of temporary privileges, monitoring, proctoring, mandatory consultations not requiring prior approval are not reportable.
Data Bank and State Reporting Requirements (cont’d)

- A physician under any of these remedial measures who returns with the ability to exercise full privileges is not reportable even if determined to be impaired.
- If, however, privileges are terminated or reduced or suspended after the leave or because physician refused to cooperate or participate or did not comply with remedial action plan, decisions are reportable to Data Bank.
  - Must decide if physician does or does not receive a hearing as part of the after care or well-being if terminated plan.
Data Bank and State Reporting Requirements (cont’d)

– If no hearing, but is reported, hospital and medical staff cannot access HCQIA immunity protections provisions.
– A better alternative would be to provide at least some form of hearing. Scope could be limited. More likely than not physician may simply resign.

• Must check state laws on reportability.
  – In Illinois, any determination that impairment exists must be reported even if physician successfully participates in a plan and privileges are maintained or restored.
  – This difference on how a state versus the Data Bank handles reporting can sometimes complicate effort to get the physician to willingly participate in a plan.
Negligent Credentialing/Malpractice Issues

- Hospital has the legal duty to make sure that physician is currently competent to exercise each of the clinical privileges given to him or her. If the hospital and medical staff knew or should have known that physician’s behavior or conduct, whether disruptive or impaired, presented a risk to patients and no appropriate remedial measures were taken, a hospital can be held independently liable in the event that a patient is injured as a result of physician’s conduct.
  - Disruptive behavior can cause break down in communication, can interfere with timely delivery of appropriate care and can cause some care givers to treat the patients of the disruptive physician differently. Injuries resulting from such conduct can expose hospital to corporate negligence claim.
  - As per studies of Professor Hickson, disruptive physicians can give rise to higher incidence of malpractice.
Confidentiality Issues

• Need to make sure that all necessary steps are taken to maximize protection of disruptive/impaired physician minutes, reports, analyses, etc. under state peer review confidentiality statutes/PSO protections.

• Patient Safety Organization ("PSO") complications:
  – If a hospital is participating in a PSO under the Patient Safety Act and is collecting peer review information, including disruptive behavior/impaired physician materials as part of its Patient Safety Evaluation System, such information is strictly privileged and confidential and not subject to discovery or admissibility in state and/or federal proceedings.
Confidentiality Issues (cont’d)

- Once reported to a PSO, it cannot be used for disciplinary purposes against the physician meaning it cannot be relied on if seeking to terminate or suspend the physician for all or some of his or her privileges.
  
  • There is an exception which would allow hospital to remove information before it is reported to PSO so that is could be used for disciplinary purposes but this action could under mine “just culture” goal of trying to convince physician to acknowledge rather than deny behavioral problems.

  ➢ Must remember that if protected under state and/or PSO confidentiality and privilege protections, hospital cannot introduce information to assert a defense in corporate negligence or other liability action (Frigo v. Silver Cross Hospital).
HR Employment Issues

• Need to compare “disruptive behavior” and “impaired physician” standards as applied to employed physicians and other hospital employees to those applied to independent medical staff members.

• It is fairly common to see employed physicians held to a higher or different standard then independent physicians.

• Process for dealing with disruptive behavior of employed physician also can be different and remedial measures can be imposed with less process and terminations imposed more quickly.
HR Employment Issues (cont’d)

• Although these disparate and conflicting standards may be legally enforceable under contract law but can result in claim that two standards of care or conduct are permitted. If lesser standard applied to independents, who otherwise might have been disciplined or terminated if employed, a patient who is impaired by a disruptive/impaired independent physician would have stronger grounds to bring corporate negligence or similar theory against hospital.

• Terminated employed physicians seldom get same hearing rights as independents but also are rarely reported even though hospital is required to do so under Data Bank requirements.
HR Employment Issues (cont’d)

- Failure to report gives rise to possible liability claims depending on how hospital responds to third party requests regarding physician’s disruptive behavior/impairment.
- If physician is reported but without first receiving a hearing, then hospital cannot seek HCQIA protections.
After Care Issues

• Physicians whose disruptive behavior, whether the result of some form of impairment or not, oftentimes are required to participate in some type of educational or rehab program as a condition of maintaining privileges.

• Terms of program can be imposed by the program itself, i.e., Hazelden or Illinois Health Professionals Program, and/or the hospital through its Physician Wellness Committee.
After Care Issues (cont’d)

• It is imperative that the hospital monitor compliance with all elements of the program or Well-Being Agreement.

• Continued membership and privileges should be generally made contingent on continued compliance with the program. Should probably also consider monitoring, or proctoring and/or concurrent review of cases to make sure there are no new or continuing problems as well as to enforce strict internal incident reporting requirements about behavior.
After Care Issues (cont’d)

• If violation of plan does not trigger removal from staff then need to document why not and what additional remedial measures will be imposed to effectuate compliance.

• Termination/suspension for violation of program would be reportable to Data Bank and probably to the state.

• Must also decide if violation will result in automatic termination with or without a hearing for the reasons previously given with respect to HCQIA protections.
Responses to Third Party Inquiries

- At some point in time, hospital is going to receive a third party inquiry about the physician as part of another appointment, reappointment or employment decision by another facility.

- Hospital needs to decide how it is going to respond, if at. The circumstances might dictate different responses, i.e., physician resigns before disruptive or impaired behavior is confirmed; physician resigns in middle of investigation; physician resigns after findings confirmed; physician terminated for failure to cooperate or to comply with after care plan; physician is successfully complying with program but is seeking appointment/reappointment elsewhere.
Responses to Third Party Inquiries

• There is no duty to respond to any third party inquiry. 
  Kadlec Medical Center v. Lakeview Anesthesia Associates (527 F.2d 412 (5th Cir. 2008)) (Circuit Court of Appeals overturned District Court decision that such a duty existed in light of knowledge of hospital and group that employed physician was impaired on Demoral because Louisiana law did not impose such a duty).
Responses to Third Party Inquiries
(cont’d)

- Although no duty to respond, if one is provided, hospital cannot purposefully nor negligently misrepresent the circumstances of physician’s status or mislead the third party (See attached advisory letter).
- Steps to consider if responding
  - Make sure that physician signs separate waiver of liability form – this is standard practice.
Responses to Third Party Inquiries (cont’d)

- Consider having physician sign absolute waiver form.
  - Use of such form was commented on favorably in recent 7th Circuit opinion. See Botvinick v. Rush University Medical Center (574 F.3d 414 (7th Cir. 2009)).
  - Even if absolute waiver is viewed as unenforceable, should be able to rely on existing state peer review immunities.
Responses to Third Party Inquiries (cont’d)

- Hospital should argue that any response to a third party inquiry is a privileged peer review communication and therefore if sued by the physician, response will be deemed inadmissible. See Soni v. Elmhurst Memorial Hospital

- Additional argument to utilize is that most hospitals also have an immunity clause in Medical Staff Bylaws for peer review decisions and communications which applies to this situation.
